ABSTRACT

This annual directory lists all local agencies providing free public elementary and secondary education in the United States and its outlying areas. The listing includes all systems regardless of size, as well as nonoperating public school districts. The main body of the directory lists, in alphabetical order by State, the local public school systems, providing the following information for each system: name of unit, superintendent's location, ZIP code, county name, grade span, and enrollment. Also included are (1) summary tables showing the number of local public school systems and their distribution by size, grade span, and State; and (2) a listing of the names of the superintendents of the operating public school systems with 10,000 or more pupils. Related documents are ED 039 638, ED 027 631, and ED 023 168. (Author)

INTRODUCTION

The primary purpose of this annual directory is to list all local agencies providing free public elementary and secondary education in the United States and its Outlying Areas. Such education is considered here to include all education through grade 12 of a general rather than a specialized nature. "Local" as used here denotes those agencies closest to the actual operation of the educational programs. This may include town, district, area, county, or even State agencies (as in Hawaii and parts of Alaska). For the convenience of users of this publication, one additional level is given in certain cases. Where administrative services are performed for more than one school district by a common superintendent, the resulting supervisory union is listed in addition to the local school districts. This arrangement is found in the States of Maine, Massachusetts, New Hampshire, and Vermont.

Except for special cases noted below, the following information is given for each system listed--name, mailing address, county, grade span, number of pupils, and number of schools. There are, however, some exceptions to this general rule as follows:

1. Large school systems (those having a pupil population of 10,000 or more) are listed in a special section in the front of the book, besides appearing in the general listing. For each of these large systems, the name of the superintendent is given.
2. Nonoperating districts (those not currently operating schools) are shown at the end of each State listing, and only the name and county are given.
3. Grade span, pupil, and school data are not reported for the supervisory unions in Maine, Massachusetts, New Hampshire, and Vermont. However, this information is given for each operating school district within these supervisory unions.
4. Since all school districts in a supervisory union share the same administrative office, the address of this office is given only once for each supervisory union, and applies to each school district in the union.

NOTES TO USERS OF THIS DIRECTORY

Name of Unit

Within each State the regular operating school systems are presented first and are followed by the nonoperating districts. In those States having supervisory unions, they and their component districts are listed next.

Where a nonoperating district is part of a supervisory union, it is placed with its union rather than with the nonoperating districts.

Within each of the categories noted above, the sequence of entries is alphabetical and numerical according to the name of the unit.

Information for the Outlying Areas of the United States is given following the alphabetical listing of States and the District of Columbia.

In some States, the legal name of a school district may differ from the popular name by which the district is generally known. The names used here are those suggested by each State education agency as being the most appropriate identifiers of the districts in that State.

Location of Superintendent

The information given here represents the mailing address of the administrative office for each operating school system or supervisory union.

These place names have been reviewed and edited to conform to U.S. Post Office recommendations as to abbreviation and spelling.

When a school system located near a State boundary has its post office address in the adjoining State, the abbreviated name of that State is given immediately after the place name.

ZIP code

This code should be considered an integral part of the mailing address.

County Name

County names are shown for operating and nonoperating districts and for supervisory unions. The county given for a school system is the one in which the superintendent's office is located, although some parts of the system may lie in other counties. In the listing for Alaska, election districts rather than counties are given in this column.

Grade Span

These entries represent the lowest and highest grades taught in a system, from prekindergarten (PK) through grade 12. In addition, the symbol UG is used to denote an ungraded system. Where information was not available, or where a grade span designation was deemed inapplicable by the respondent, this column is left blank. It is also blank for nonoperating districts and supervisory unions.

Pupils

The figures reported here represent average daily membership (ADM) for the school year 1969-70. Where this measure was not available, other pupil counts were used as follows:

Fall 1969 enrollment or membership:

Idaho
Illinois
Kansas
Maryland
Massachusetts
Missouri
New York
Vermont

Other:

Florida	- ADM for first 7 months of 1969-70 school year
Virginia	- 1969-70 average daily attendance, divided by 94 percent to approximate ADM

New districts in all States - estimated fall 1970 enrollment, where available. Where such estimates were not available, the column is left blank.

Note - Fall enrollment is the number of pupils on the rolls on a specific date (usually October 1) early in the school year. ADM is the average number of pupils on the rolls during the school year. Fall enrollment is generally about 1.5 percent higher than ADM for a given year.

Children living within the boundaries of nonoperating districts are counted in the systems in which they attend school.

Schools

Entries in this column indicate the total number of public elementary and secondary schools in each operating system. Where this information was not available, no entry appears. Such is the case for all systems in Michigan, Oklahoma, and Tennessee and for a few scattered systems in other States.

Comparability With Other Reports of the U. S. Office of Education

Since this publication is a directory of school systems, rather than a statistical report, primary attention has been given to the accuracy of names and locations. While the numbers of pupils and schools can be fairly reliable indicators of a school system's size, they should not be construed as official statistics of the Office of Education. Official figures in these areas can be found by State in Fall 1969 Statistics of Public School Systems (OE-20007-69) and for selected districts in Statistics of Local Public School Systems/Fall 1968/Schools, Pupils, Staff (OE-20112-68).

Mailing to School Systems

The following form of address is suggested for mailing to a school system:

Superintendent of Public Schools
Name of school system
City or town, State, ZIP code
